

KELVIN FAUSTIN LIHAWALA

SUMMARY

GIS and Remote Sensing graduate with practical experience in environmental and geospatial data collection, field verification, data quality assurance, reporting, dashboard development, and spatial analysis. Experienced in supporting research and project activities through KoboToolbox-based data collection, GIS data management, technical documentation, and evidence-based decision-making. Possesses foundational knowledge of Monitoring, Evaluation and Learning (MEL) and a strong interest in environmental conservation, landscape restoration, and community-based sustainable development.

EXPERIENCE

Solution engineer intern

Esri | March 2026 - June 2026

- . Developed GIS workflows using ArcGIS Pro and ArcGIS Online to support evidence-based geospatial problem solving.
- . Created ArcGIS Dashboards, web maps, and spatial visualization products for monitoring and decision support.
- . Processed and analyzed geographic datasets including land-use information, environmental constraints, and spatial indicators to support evidence-based decision-making.
- . Performed spatial analysis and data validation to improve accuracy of GIS outputs.
- . Prepared technical reports, presentations, and Story Maps to communicate project findings and support stakeholder engagement.
- . Collaborated with technical team members to deliver accurate and professionally documented geospatial outputs.

Fiber network specialist

TTCL / October 2025- November 2025

- . Supported fiber optic network installation through route verification, field data recording, and coordination with technical teams.
- . Verified field observations against GIS datasets and maintained accurate documentation of collected data.

GIS&telecom intern

TTCL | September 2023 - October 2023

- . Conducted GPS-based field data collection and spatial verification for telecommunications infrastructure mapping and planning.
- . Compared field observations with GIS datasets to validate geographic information and improve spatial-data accuracy.
- . Assisted in organizing field findings and preparing technical documentation to support project planning, reporting, and decision-making.

PERSONAL DETAILS

📞 0674131266 / 0798657811

EDUCATION

Degree

Bachelor of Science in
Geographic Information
System and Remote
Sensing (GIS&RS)
Ardhi University, Dar Es
Salaam

Graduated: December 2025

Advanced Certificate

Secondary Education
Pandahill Secondary School,
Mbeya

Completed: May 2022

Certificate

Secondary Education
St. Augustine Tagaste
Secondary
School, Dar Es Salaam

Completed: November 2019

CORE COMPETENCIES

- . Data collection
(KoboToolbox, GPS)
- . Environmental and Land-Use
Analysis
- . Monitoring and
Environmental Data Collection
Support
- . Reporting and
documentation
- . Dashboard preparation and
data summaries
- . GIS and Spatial Analysis
- . Field Monitoring, Field
Surveys, and GPS-Based
Verification

TECHNICAL TOOLS

- . QGIS
- . ArcGIS Pro
- . ArcGIS Online
- . ArcGIS Dashboards
- . R
- . Google Earth Engine
- . Google Earth Pro
- . Microsoft Excel, word and powerpoint

RESEARCH & PROJECT EXPERIENCE

Environmental Pollution Research Support

- Supported a PhD-led environmental pollution research project using KoboToolbox for digital data collection.
- Assisted with field data collection, data entry, verification, and organization of research datasets for analysis and reporting.
- Conducted routine checks to support the completeness, accuracy, and consistency of collected information.

GIS-Based Suitability Analysis for Telecommunication Assets

Undergraduate Dissertation Project

- Processed satellite imagery and geographic datasets using ArcGIS Pro.
- Performed land use and land cover analysis, raster analysis, reclassification, and suitability modeling.
- Integrated environmental and infrastructure constraints for location planning.
- Prepared the final dissertation report and delivered a formal presentation of findings.

Additional GIS, remote sensing, Web GIS, Story Maps, dashboard, and spatial analysis projects are available through the portfolio link above.

ADDITIONAL INFORMATION

- Foundational knowledge of Monitoring, Evaluation and Learning concepts.
- Strong analytical, organizational, and time-management skills.
- Excellent written and verbal communication skills in English and Kiswahili.
- Comfortable working collaboratively in multidisciplinary and multicultural teams.
- Willing and available to travel to project landscapes and remote field locations.
- Strong interest in environmental conservation, landscape restoration, climate resilience, and sustainable community development.
